# A National Level collaborative Indian Mapping Event

IITB-AICTE
MAPATHON

Create maps using observations or remote sensing data using free and open source software

About Mapathon

Mapathon is a map-making competition for creating thematic maps. This event, organized jointly by IIT Bombay and AICTE invites all Indian nationals to produce maps. The primary objective of this event is to understand the potential of maps for Indian regions using free open source mapping software (QGIS). The participants will collectively work in a crowdsourcing method for jointly producing thematic maps of India.

Registration starts from
1 February 2022

Benefits

- Get certificates and recognition
- Win exciting prizes
