

# TCS Global Internship Program

The students, who work in an industrial R&D environment, get access to industry-scale problems and data. They also get a chance to interact with some of the world's best researchers. The internships can vary from six to eight weeks (short internships) or 16 to 18 weeks (long internships), with an option of tailoring the duration in certain cases.

## **Eligibility Criteria**

**Final year B.E. or BTech students with an aptitude for research in any area of computer science.**
