< HACK the VIBE >>>

It's time for a
HACKATHON!

Challenge Yourself To
<Artificial Intelligence &
Machine Learning>

Welcome to Fibe- Hack the Vibe! Our credit scoring hackathon. The challenge is to develop a machine-learning model that can accurately predict which individuals are most likely to default on their loans.Join us in this hackathon and showcase your skills in data analysis and machine learning to help improve credit decision-making processes and hack the vibe of the lending industry.
