Build on your sustainability ideas

Apply and win a chance to see your ideas
transform into a workable prototype

supported by

wipro foundation

**Selected 25 teams will receive upto 50K
support for developing their protoytpes.**

The Challenge

In the Ideas to Impact challenge, participants will be provided with an opportunity to ideate solutions for issues concerning the circularity of resources.

Students will look at sustainable alternatives to resource management, including air, water, energy, soil and material/ waste. A few problem statements are available for reference. Students may use these statements as guides and build ideas around them. They are also free to look at other topics and ideas.
